Artist Statement

My portfolio work has primarily focused on pop culture, geometric, and social environmental/consumer issues in the medium of nu-pastel. I like to portray art that are high on the demand or pop culture(s) that are up and coming. My intention is to evoke nostalgia and to express more expansively. For consumer issues, my intention is to advocate the consumers on their spending habits. I also like to work on geometric arts. I find working on geometric arts to have interesting shapes, angles, styles, patterns, and sizes that gives viewers many different perspectives. Although my art may not relate, I think people get a general perspective on every single piece of craft I work on.
